California Natural Diversity Database

CNDDDB SUBSCRIPTION/RENEWAL FORM

The California Natural Diversity Data Base (CNDDDB) collects information on the locations and condition of California's rare species, and natural communities and enters these data into a computerized data management and mapping system. The entire inventory can be purchased in the form of a PC database application called RareFind 2 on an annual subscription basis. It can be used either as a stand-alone research tool or linked with the GIS application ArcView for even greater flexibility. Your subscription includes:

- RareFind 2 - Available on CD ROM (RareFind 2, GIS, and Metadata).
- 6-month Update, or monthly, password-protected website FTP (File Transfer Protocol) updates (First 6 months only).
- GIS coverage for use in ArcView or ArcInfo on CD ROM or on the Department of Fish and Game's FTP site. Call for address and password.
- Map overlays at \$20 per quad (\$30 for mylar media).

Commercial (for-profit) Subscription = \$2,500

Non-commercial (Government/Tax-exempt) Subscription = \$1,250

Renewals of existing subscriptions are given a 10% discount.

(2,250 for Commercial Renewal rate, \$1,125 for Non-Profit/government Renewal rate.)

Organizations can make as many copies of the data and application as necessary for their internal use, but cannot make copies for distribution outside of their organization.

Call the CNDDDB Information Services at (916) 324-3812 to order. We will send your initial data set and bill you, or FAX us your order by completing the information below.
FAX (916) 324-0475.
